3. The application has been amended as follows:

Claim 27 has been cancelled.

Claim 28 has been replaced with

--28. A method for automatically operating an irrigation controller comprising the steps of:

- a. providing said controller with a preliminary irrigation schedule for a geographic location and approximate latitudinal information for the geographic location;
- b. computing a water budget ratio by comparing values in a table of current local geo-environmental data with values in a table of stored local geo-environmental data, said local geo-environmental data comprising extraterrestrial radiation (RA) values arranged by date and by approximate latitude, by

1. computing a standard temperature budget factor using said stored local Geo-environmental data by multiplying an expected maximum temperature for a time frame by an extraterrestrial radiation value for said geographic location;
  2. computing a periodic temperature budget factor using said current local geo-environmental data by multiplying an actual recorded maximum temperature taken over a previous predetermined time period by an extraterrestrial radiation value for said geographic location during said predetermined time period; and
  3. dividing said periodic temperature budget factor by said standard temperature budget factor; and
- c. modifying said preliminary irrigation schedule based upon said ratio.--

Claim 29 has been cancelled.

Claim 30 has been cancelled.

Claim 31 has been cancelled.
